PROFILE

Full stack web developer based in beirut, Lebanon who enjoys building webapps. Very positive and highly motivated person with over 2 years of experience in building beautiful websites and web applications with a stronger focus on the Front-end technologies, I also have a very high aptitude for learning and adapting to new languages and features.

PROJECT.EXPERIENCE

2023, Duration: 2 months

NOVAGRAM

Technologies used: React, Flask, SQLAlchemy

Novagram is a social media Instagram clone app that uses almost all React features to deliver a seamless working app.

- Used a RESTful api (imgur) for posting images
- Caching used with React query to improve app performance
- Designed a mobile responsive UI
- Created reusable components

2022, Duration: 1 month

BOOK STORE

Technologies used: Flask, javascript, Sqlite and Bootstrap

Book store is an e-commerce book store webapp where customers can buy their favourite books and authors can sell their books.

- Created a Library for users to read their favourite books online
- Flawless implementation of cart, wishlist and purchase history
- Implemented a dashboard for authors to track their book sale info and ratings
- Sqlite db used to store books, users and transactions info

2021, Duration: 15 days

Technologies used: Django, javascript, Bootstrap

AUCTIONME

Auction me is an auction webapp where users can put their items on auction while other users can bid to purchase that item.

- Seller has the control over when to stop the auction
