ABOUT ME

Javascript front end web developer for 2 years worked on many projects from small to large scale ones, proficient in React js. Have an aptitude for learning and adapting to new languages and features.

EXPERIENCE

NOVAGRAM   **Duration:** 2 Months

Technologies used: React, Flask, SQLAlchemy,

Novagram is a social media **Instagram** clone app that uses almost all React features to deliver a seamless working app.

- Hooks (state, ref, effect, memo, callback, context)
- React router v6
- Caching used with React query to improve app performance
- Designed a mobile responsive UI
- Used a RESTful api (imgur)
- Created reusable components

Project Link: here

BOOK STORE   **Duration:** 1 Month

Book store is an e-commerce book store app built using JS and Flask, which offers a very interactive UI for it's users.
- The ability to add to (cart, wish list), purchase products
- User can view his purchased items in the library page
- User can track his purchase details in the history page

SKILLS

- React : react-router, React query, JSX, Hooks
- Languages: Javascript, es6, CSS3, HTML5, python(Flask and Django).
- SQL: SQLAlchemy, MySQL, Sqlite
- NOSQL: MongoDb
- Familiar with Node js and express js
- Debugging / bug fixing
- Designing mobile responsive apps
- Familiar with Git and Github
- Knowledge of Bootstrap or pure css for custom designs
- Familiar with DevOps practices (CI/CD, automation, testing…)
